

April 2022

The 90th anniversary of J.A.M.

The 1st April 2022 marked the 90th anniversary of the J.A.M. foundation. We would like to thank all of you for your continued patronage and support throughout the past 90 years of the company.

In April 1932, our founder Teiichiro Mizuno established "Mizuno Seisakusho" a parts processing company. In response to the rapid growth in demand for consumer products such as TV sets, etc. in the 1960s and 1970s, which was also a period of high economic growth, we launched one product after another. These became the origins of the current main product groups, which included connectors, crimping machines, precision presses, precision vises, etc.

In January 1968, we changed our company name to "Japan Automatic Machine Co., Ltd.". We have been providing products and services useful for our customers' "*monozukuri*" (manufacturing) by establishing domestic and global system encompassing development, production, sales, and service.

Currently, not only the way we live, work, and do business but even our society is undergoing a sea change in the wake of the current pandemic. In addition to that, new technologies such as renewable energy, EV, autonomous driving, and 5G are developing rapidly. We will continue to provide high value-added products and services in response to those global market and changing customer needs.

Under our group vision of "Becoming the 'best partner for customers' through 'world class products' and 'value-creation' beyond expectation", J.A.M. Group will continue to grow and develop as a strong united team towards the 100th anniversary and beyond.

We look forward to your continued support and guidance.

Masafumi Mizuno
President and Chief Executive Officer
Japan Automatic Machine Co., LTD.
